PATENT

**CLAIM AMENDMENTS:**

1. (Currently amended) A method for image sharing based on a face in an image, comprising:  
defining a sharing rule that specifies with which one or more recipients images are shared, the sharing rule based on face identifying information; and applying face identifying information associated with the image to the sharing rule to determine the one or more recipients with which the image should be shared.
2. (Original) The method of claim 1, further comprising:  
determining the face identifying information associated with the image using a face recognition technique in conjunction with a database of face information.
3. (Original) The method of claim 1, further comprising:  
determining the face identifying information associated with the image by a user identifying a face in the image.
4. (Original) The method of claim 1, further comprising:  
automatically making the image available to the determined one or more recipients.
5. (Previously Amended) The method of claim 4, wherein making the image available comprises at least one of automatically sending a copy of the image to the determined one or more recipients by e-mail and automatically sending a link to the image on a Web site to the determined one or more recipients.
6. (Original) The method of claim 1, further comprising converting the face identifying information into face data using a face information database.
7. (Previously Amended) The method of claim 1 wherein the image comprises at least one of a digital photo and a digital video.

42390P11167

## PATENT

8. (Previously Amended) The method of claim 1 wherein the sharing rule specifies at least one of a set of face identifying information, a range of face identifying information and a characteristics of an item or set of face identifying information.

9. (Original) The method of claim 1 wherein the sharing rule comprises a rule that images are only to be shared with the one or more recipients that are on a buddy list.

10. (Original) The method of claim 1, whercin the face identifying information comprises a personal name of a person whose face is in the image.

11. (Currently amended) A system for image sharing based on a face in an image, comprising:

a sharing rule defined with which one or more recipients images are shared, the sharing rule based on face identifying information; and

a sharing engine to apply face identifying information associated with an image to the sharing rule to determine the one or more recipients with which the image should be shared.

12. (Original) The system of claim 11, wherein the sharing engine is further adapted to determine the face identifying information associated with the image using a face recognition technique in conjunction with a database of face information.

13. (Original) The system of claim 11, wherein the sharing engine is further adapted to determine the face identifying information associated with the image by a user identifying a face in the image.

14. (Original) The system of claim 11, further comprising:

a sending unit to automatically make the image available to the determined one or more recipients.

42390P11167

## PATENT

15. (Previously Amended) The system of claim 14, wherein the sending unit is adapted to at least one of automatically send a copy of the image to the determined one or more recipients by e-mail and automatically send a link to the image on a Web site to the determined one or more recipients.

16. (Original) The system of claim 11, wherein the sharing engine is further adapted to convert the face identifying information into face data using a face information database.

17. (Previously Amended) The system of claim 11 wherein the image comprises at least one of a digital photo and a digital video.

18. (Previously Amended) The system of claim 11 wherein the sharing rule specifies at least one of a set of face identifying information, a range of face identifying information and a characteristic of an item or set of face identifying information.

19. (Currently Amended) A computer program product including computer program code to cause a processor to perform a method for image sharing based on a face in an image, the method comprising:

defining a sharing rule defining with which one or more recipients images are shared, the sharing rule based on face identifying information; and  
applying face identifying information associated with the image to the sharing rule to determine the one or more recipients with which the image should be shared.

20. (Original) The computer program product of claim 19, wherein the method further comprises determining the face identifying information associated with the image using a face recognition technique in conjunction with a database of face information.

42390P11167

## PATENT

21. (Original) The computer program product of claim 19, wherein the method further comprises determining the face identifying information associated with the image by a user identifying a face in the image.
22. (Original) The computer program product of claim 19, wherein the method further comprises automatically making the image available to the determined one or more recipients.
23. (Previously Amended) The computer program product of claim 22, wherein making the image available comprises at least one of automatically sending a copy of the image to the determined one or more recipients by e-mail and automatically sending a link to the image on a Web site to the determined one or more recipients.
24. (Original) The computer program product of claim 19, wherein the method further comprises converting the face identifying information into face data using a face information database.
25. (Previously Amended) The computer program product of claim 19 wherein the image comprises at least one of a digital photo and a digital video.
26. (Previously Amended) The computer program product of claim 19 wherein the sharing rule specifies at least one of a set of face identifying information, a range of face identifying information and a characteristic of an item or set of face identifying information.
27. (Original) The computer program product of claim 19 wherein the sharing rule comprises a rule that images are only to be shared with the one or more recipients that are on a buddy list.
28. (Original) The computer program product of claim 19, wherein the face identifying information comprises a personal name of a person whose face is in the image.

PATENT

42390P11167

29. (Original) A computer program product including computer program code to cause a processor to perform a method of sharing an image having a face, the method comprising:

analyzing the image to determine the face;

associating face identifying information to the image corresponding to the determined face;

determining a recipient of the image based upon the face identifying information; and making the image available to the recipient.

30. (Previously Amended) The computer program product of claim 29 wherein the image comprises at least one of a digital photo and a digital video.

31. (Previously Added) A method of sharing an image having a face, comprising:

analyzing the image to determine the face;

associating face identifying information to the image corresponding to the determined face;

determining a recipient of the image based upon the face identifying information; and making the image available to the recipient.

32. (Previously Added) The method of claim 31 wherein the image comprises at least one of a digital photo and a digital video.
